

DESCRIPTION OF SERVICES

RESPIRATORY PACKAGE: Includes pulmonary function, questionnaire, vital signs, qualitative fit, respiratory training, and documentation.

PULMONARY FUNCTION TEST: Using a portable spirometer, tests for lung capacity before employees may wear a respirator. Usually done with pre-respirator fitness and questionnaire. Employer receives certification with physician's signature.

PRE-RESPIRATOR FITNESS: Respirator use questionnaire, vital signs, and medical history sent to physician, along with pulmonary function test.

RESPIRATOR FIT TEST:

Qualitative: Using hood and bitter solution, technician confirms proper respirator size and fit for respirators that require a 100 fit factor.

Quantitative: Fit test using PortaCount equipment for any tight-fitting face piece respirator.

BLOOD DRAWS FOR LEAD/ZPP: Blood drawn and sent to lab to test for lead and ZPP levels. Both employers and employees receive copies of all test results.

LEAD PACKAGE: Includes blood draw, training, and documentation.

24-HOUR FIRST AID RESPONSE: Technicians are dispatched to your jobsite to assist injured workers. First Aid level injuries are treated in a timely manner. If needed, workers are sent to a designated health care provider.

DRUG TESTING: Urine collections done with or without breath alcohol testing. DOT and private panels using customer's forms and lab or On-Site's forms, lab and MRO. Programs may be managed by existing consortiums. Collections include pre-employment, post accident, reasonable cause, random selections, etc.

IMMEDIATE RESULT DRUG TEST: Urine analysis for drug screening done on-site with results available in 5-10 minutes. Standard test is DOT 5-panel. Custom panels are also available.

AUDIOMETRY: Hearing test performed with a portable audiometer. Meets OSHA requirements for hearing conservation programs. Each ear tested at 500, 1000, 2000, 3000, 4000, 6000 and 8000 Hz. Results are signed by a physician and sent to the employer.

HEARING CONSERVATION PACKAGE: Includes audiogram, training, quiz, and documentation.

NEW-HIRE ORIENTATION: Training for new-hires done for individual companies to their specifications. May include company orientation, site-specific training, respiratory protection, fall protection, forklift, confined space, etc.

STAND BY: Safety technicians on-site for the duration of any size job, to provide first aid care. First aid may be provided on-site instead of sending employees off-site unnecessarily. Services may include rescue trained, confined space attendant.

CPR AND FIRST AID TRAINING: CPR training meets OSHA requirements. Available classes include Adult only, or Adult/Child/Infant CPR. May include a first aid class tailored to employee's workplace situations.

SAFETY TRAINING CLASSES: Classes are taught to meet the requirements of a particular job or company. A complete list of classes is available. Taught in both English and Spanish.

CONTRACT SAFETY PERSONNEL: Technicians on-site for the duration of any job to assist safety staff, manage injuries, provide safety training, perform audits, and record keeping.

WELLNESS SCREENING: Collection of health-related data for use in wellness programs.
